Accountability requirements

The *Government Owned Corporations Act 1993* establishes four key principles for government owned corporations:

- clarity of objectives
- management autonomy and authority
- strict accountability for performance
- competitive neutrality.

Queensland state government financial statements

Each year, Queensland state public sector entities must table their audited financial statements in parliament.

These financial statements are used by a broad range of parties including parliamentarians, taxpayers, employees, and users of government services. For these statements to be useful, the information reported must be relevant and accurate.

The Auditor-General's audit opinion on these entities' financial statements assures users that the statements are accurate and in accordance with relevant legislative requirements.

We express an *unmodified opinion* when the financial statements are prepared in accordance with the relevant legislative requirements and Australian accounting standards. We *modify* our audit opinion when financial statements do not comply with the relevant legislative requirements and Australian accounting standards and are not accurate and reliable.

Sometimes we include an *emphasis of matter* in our audit reports to highlight an issue that will help users better understand the financial statements. It does not change the audit opinion.
